

## Other Products

### Ultrasonic Type Level Indicator

For Powdered Materials

For Liquids

**Ultrasonic beam angle is a minimum of 2.5° per side, minimizing the influence of diffuse reflection.**

**Integrated controller. Multi-controller capable of connecting up to 15 channels also available. 4 to 20 mA DC analog output and alarm/control relay output included as standard.**

- Can measure a variety of powdered materials and agglomerates.
- Easy installation and compact design.
- Sensor materials are PP, PVDF, and PTFE.
- Two-wire design allows reduction of wiring costs. (Depending on specifications)
